DETAILED ACTION

Claims 1-16 are pending.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, 15-16, drawn to modified factor VIII cDNA, characterized in that in positions where introns 1 and 13 in the genomic factor VIII sequence are inserted, the cDNA of factor VIII also contains one or more spliceable nucleotide sequences or a nucleotide sequence which will be spliced during the export of the pre-mRNA from the nucleus.

Group II, claim(s) 12-13, drawn to a human factor VIII protein encoded by a modified factor VIII cDNA characterized in that in positions where introns 1 and 13 in the genomic factor VIII sequence are inserted, the cDNA of factor VIII also contains one or more spliceable nucleotide sequences or a nucleotide sequence which will be spliced during the export of the pre-mRNA from the nucleus.

Group III, claim(s) 14, drawn to a transfer vector for use in human gene therapy characterized in that it comprises a modified factor VIII cDNA, characterized in that in positions where introns 1 and 13 in the genomic factor VIII sequence are inserted, the cDNA of factor VIII also contains one or more spliceable nucleotide sequences or a nucleotide sequence which will be spliced during the export of the pre-mRNA from the nucleus.

The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-III appears to be that they all relate to a modified factor VIII cDNA having a polynucleotide sequence inserted in place of introns 1 and 13.

Art Unit: 1656

However, Plantier et al. (2001 Thromb Haemost 86: 596-603; IDS 11.04.08) teach a modified factor VIII cDNA having a truncated intron I sequence of factor IX inserted in factor VIII cDNA at factor VIII introns 1, 12, and 13.

Therefore, the technical feature linking the inventions of Groups I-III does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Accordingly, Groups I-III are not so linked by the same or a corresponding special technical feature as to form a single general inventive concept.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art,

Art Unit: 1656

the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
